Bitdefender®

GravityZone Business Security

Bitdefender GravityZone Business Security is a bundle of security services designed for small and medium businesses, combining #1-ranked security with the simple centralized management of workstations and servers.

"During one year of the toughest testing in the industry, Bitdefender Endpoint Security consistently outperformed all competition with an exceptional combination of efficiency and safety for corporate users"

Andreas Marx, CEO of AV-TEST

UNFOLLOW THE TRADITIONAL

Bitdefender GravityZone Business Security is a powerfully simple security solution to protect your business. **Unlike other solutions, Bitdefender does not trade performance for protection and does not slow down your users' computers.**

With Bitdefender GravityZone Business Security, you can focus on your business

You already have enough business issues to take care of. Now you can start focusing more on your daily business and forget about security issues. You don't need to be an advanced IT admin to manage Bitdefender GravityZone Business Security. It can be installed in minutes and managed by users with no IT background.

With Bitdefender GravityZone Business Security, you can save more money and time

You already have a list of cutting costs successes. Now you can add a new one. The web-based version of Bitdefender GravityZone Business Security moves the administration of the security software running on PCs to the cloud, saving the money spent on additional hardware. If you need to protect more geographically-dispersed offices, you will benefit from the centralized security provided by Bitdefender, eliminating the costs of buying and maintaining hardware for each site.

With Bitdefender GravityZone Business Security, you enjoy the best protection and performance

You may have already tried many products to protect your business. Now try Bitdefender GravityZone Business Security, because Bitdefender has consistently ranked the #1 security software in tests by independent reviewers such as AV-TEST and AV Comparatives and it does not compromise protection for performance.

KEY FEATURES

Read Less

It's easy to install and easy to manage

- Automatically uninstall legacy solutions
- Console is available immediately after signup
- Automatically discover network computers using Windows Network Discovery
- Start faster with provided security policy templates
- Granular policy settings are available for advanced admins, but those without an IT background will also find the solution simple to manage

Cut Costs

Web-based security eliminates the need for hardware

- Implement a powerful but simple solution and eliminate the need for dedicated servers, maintenance or more IT staff
- Reduce costs and centralize security for any number of users to a single console
- With centralized management, employees never have to update, monitor or troubleshoot security again, and can focus 100% on the business.

Relax

Forget about security issues

- Bitdefender consistently ranks first in independent tests so you can relax knowing you have the best protection.
- Our solution protects computers against viruses, rootkits, malware, phishing, data loss, web threats and much more.
- Advanced heuristics, web filtering, search advisor, USB scanning to block all malware entry point are included
- The updates are automatic and users can't interfere with settings or deactivate protection so your business is protected.
